### Project Description

As a member of the PMO, I worked on the ABC project to modernize our system and processes. I guided portfolio and project activities and maintained project governance while working with key stakeholders and vendors. I attended pre-project meetings to approve the charter. I provided templates and reports, attended the kick-off meeting, and facilitated team meetings and collected performance data. I participated in change control meetings, managed project knowledge, and successfully closed and transitioned deliverables to the client.

This is a brief example of your project work experience. Each entry must be a minimum of 100 words, but the suggested length is between 200-500 words.

# PROJECT MANAGEMENT EXPERIENCE (CONT.)

## Tips:

- Use project management terminology that you have learned in class.
- Avoid jargon from your own industry. The experience of a rocket scientist or an educational administrator should look similar, because you are explaining your project management work.
- Don't try too hard to impress. If your project had challenges, note them, and explain how you dealt with them.
- You didn't do the work all by yourself. Remember to include your interactions with team members and other stakeholders.
- Make sure that you are describing a project and not daily operations.
- What made this project unique? List any special environmental influences or risks that you may have faced.
- Remember to include the outcome. Was it successful? Were there lessons learned?

*The PMP® Exam will not change with the release of the PMBOK® Guide - Seventh Edition*

# PMBOK SEVENTH EDITION

- PMP® exam updates are NOT tied to PMBOK® Guide updates.
- The PMBOK® Guide is one of many references for the exam, but it is not a test-preparation tool.
- When the PMBOK® Guide - Seventh Edition is released, the PMP® exam will not change again.
- PMP® exam updates are based on important factors, but a PMBOK® update is not one of them.
